POLICY BULLETIN #10-35-SYS
(This Policy Bulletin Replaces PB #08-160-SYS)

REPORTING SYSTEM OUTAGES AND BROKEN MACHINERY

Date: April 7, 2010	Subtopic(s): System Outages
<p>☞ This procedure can now be accessed on the FIAweb.</p> <p>Definition of outage</p> <p>Operational impact</p>	<p>Revisions to the Original Policy Bulletin:</p> <p>This policy bulletin is being revised to:</p> <ul style="list-style-type: none"> • Add the instructions on what to do when the Automated Metrocard Information System (AMIS) experiences hardware, software, or network problems. <p>Purpose:</p> <p>The purpose of this policy bulletin is to inform Job Center and Non Cash Assistance Food Stamp (NCA FS) Center staff of the steps to follow when there are specific system outages or broken machinery. It serves as information for all other staff.</p> <p>An outage is defined as a problem that impacts the ability to perform all or a portion of the designated operational functions. An outage lasts at least 30 minutes and:</p> <ul style="list-style-type: none"> • affects five or more staff members in areas with more than five staff members (e.g., the Case Management Unit), or • affects areas that typically have fewer than five staff members (e.g., Front Door Electronic Reception [FRED]). <p>Whenever a JOS/Worker experiences technical problems, he/she must contact the Center-designated Outage Liaison who is responsible for detecting and reporting system outages. The Center-designated Outage Liaison must first notify the MIS Help Desk via telephone and obtain a Help Desk Ticket for the problem if he/she is unable to resolve it. The Center-designated Outage Liaison must then notify the appropriate Supervisor, the Center Director and the Regional Manager of the problem.</p>

HAVE QUESTIONS ABOUT THIS PROCEDURE?
 Call 718-557-1313 then press 3 at the prompt followed by 1 or
 send an e-mail to *FIA Call Center Fax* or fax to: (917) 639-0298

Center-designated
Outage Liaison
responsibilities

The following is a list of the responsibilities of the Center-designated Outage Liaison:

Staff should access the SPOC HRA Help Desk Information Directory from the HRA Intranet (see link) as MIS regularly updates this information.

- Determine operational impact as defined on the previous page.
- If the failure is determined to be an isolated incident, advise the JOS/Worker to review the Single Point of Contact (SPOC) Human Resources Administration (HRA) Help Desk Information Directory (**Attachment A**) or view the desk guide on the HRA Intranet at [SPOC HRA Help Desk Information Directory](#) and contact the appropriate Help Desk.
- If the failure is found to be an outage, consult **Attachment A**, which will indicate who at Management Information Systems (MIS) should be contacted. If the problem application/issue is not listed on **Attachment A**, contact the MIS Help Desk.
- Advise the Unit Supervisor, Center Director and Regional Manager of all outages reported to a Help Desk.

Instructions for
contacting a Help Desk

When contacting a Help Desk, the Center-designated Outage Liaison should be prepared to provide the following:

- Functions that are affected
- Areas that are affected
- Number of people who are affected
- Description of technical issues
- Attention-grabbing subject heading on e-mail (e.g., “Urgent: Operational Outage”)
- Statement indicating that he/she is reporting an outage

Not required when
calling the MIS Help
Desk.

The above requirements apply to all applications used in Job Centers and NCA FS Centers such as Paperless Office System (POS), FRED, Model Office Numbering Identification and Queuing (MONIQ), HRA OneViewer, New York City Work, Accountability and You (NYCWAY), the Automated Child Care Information System (ACCIS) and the Automated Metrocard Information System (AMIS). The Center-designated Outage Liaison must refer to **Attachment A** to determine the appropriate Help Desk to contact.

The Center-designated Outage Liaison may have additional requirements for specific system and machinery malfunctions as indicated on the following pages.

Welfare Management System (WMS)

If a JOS/Worker realizes that there is a problem with Welfare Management System (WMS), he/she should notify the Center-designated Outage Liaison as soon as possible. The Center-designated Outage Liaison will:

- assess the outage
- report it to the following:
 - WMS Hotline: **(212) 961-8048**
 - POS Help Desk: **(718) 510-0551 press 1**
 - Systems Administration: email (Sysadmin MIS)

Refer to [PB #04-24-SYS](#) for details on the POS Help Desk.

Note: The WMS Hotline may ask for specific information about the actual problem, the computer, or the location.

The Office of Temporary and Disability Assistance (OTDA)/WMS will notify the MIS Office of Systems Operations (OSO) of citywide and center-wide outages or application deficiencies. OSO will then report the information to the MIS Help Desk via Support Magic and issue a Fax Flash.

MAPPER

MAPPER can be unavailable as a result of a WMS outage or because of its own systemic problems.

If MAPPER is unavailable for **at least 30 minutes**, do not make a manual Bureau of Eligibility Verification (BEV) appointment. BEV will contact the applicant and schedule a home visit. When MAPPER becomes available, staff should resume BEV scheduling per current procedure.

Zipper

If a Zipper is malfunctioning, the Outage Liaison must contact the MIS Help Desk and the local SysAdmin should be made aware of the problem via e-mail. If there is simply a problem with the text, contact the Chairperson(s) of the Model Center Technical workgroup instead of the MIS Help Desk.

AMIS

New Information

All staff at Job Centers who experience problems with AMIS should contact the Center-designated Outage Liaison. The Center-designated Outage Liaison will determine the nature and extent of the problem, and resolve it if possible.

Center-designated Outage Liaison

If the system has been down for **at least 30 minutes**, and the Center-designated Outage Liaison is unable to resolve the problem, he/she must report the AMIS problem to the MIS Help Desk at **(718) 557-1313**.

The Center-designated Outage Liaisons should provide the following information to the MIS Help Desk when the outage is reported:

- Affected PC listed by functional area – e.g., D&C, CMU or CSIC, as well as PC name such as “W180WAT25J023.”
- Extent of the problem – affects one user/section or affects 20 or more users/entire Center, working in one area but not another, etc.
- Names and numbers of the contact person(s) in case MIS staff needs to talk directly to the person to resolve the issue, e.g., Mary Jones, (212) 423-4567.
- Description of the issues – e.g., screen freezes, blank screen, case information does not appear, etc.

The MIS Help Desk will provide the Center-designated Outage Liaisons with a Help Desk Ticket Number.

Once the MIS Help Desk Ticket has been received, the Center-designated Liaison must notify the appropriate Supervisor, the Center Director and the Regional Manager of the AMIS issue.

Steps to follow when specific machines are malfunctioning or out of service

Copy Machine

If a copy machine is out of service, contact the Center Designee, instead of the Center-designated Outage Liaison, so that he/she may contact the vendor for service.

Printer

If a JOS/Worker is experiencing problems with a printer, he/she should report these problems to the Center-designated Outage Liaison. The Center-designated Outage Liaison should assess the source of the problem from where the JOS/Worker is attempting to print.

- If the JOS/Worker is having trouble printing from a specific application (e.g., POS, NYCWAY), the Center-designated Outage Liaison should contact the Help Desk specific to that application.
- If the JOS/Worker is attempting to print from a computer program such as Microsoft Word or Outlook, the Center-designated Outage Liaison should contact the SysAdmin and consult **Attachment A**. The SysAdmin will temporarily reroute the output to another printer.
- When contacting the MIS Help Desk for personal computer (PC)/printer hardware issues, have the following information available:

- Is the unit receiving power (plugged in)?
- Are other staff members experiencing the same problem or is the problem isolated?
- Has the SysAdmin been contacted?

Scanner

If a scanner is not working, the Center-designated Outage Liaison must:

- contact the MIS Help Desk, and
- contact the local SysAdmin via e-mail so he/she is aware of the issue.

Light Emitting Diode (LED)

If the LED system is not functioning, it is the JOS/Worker's responsibility to type the error message from the LED system in an email and send it to the POS Help Desk.

COLD (also known as WebCOINS)

If a JOS/Worker notices a malfunction on the Computer Output to Laser Disk (COLD) system, it is necessary for him/her to alert the MIS COLD Liaison. The COLD Liaison will contact the New York State Enterprise Helpline at **(800) 697-1323**.

Televisions

A liaison should be appointed by the Center Director to check the televisions and determine the scope of the problem. The Center Director's office is responsible for calling the service provider (Time Warner or DK connections) to inquire about the nature of the problem.

- If informed that it is a service issue, the Center Director's office should arrange for a technician to visit and inform the Regional Office and the MIS Help Desk.
- If it is a billing issue, the Center Director's office should contact the Regional Office, Finance Office, and MIS Contracts, who will attempt to resolve the issue.
- If the television is malfunctioning, contact General Support Services (GSS).

Telephones

This may or may not be the same liaison authorized to report outages.

In the event of a telephone outage, the designated Telephone Liaison for the affected Site or Responsibility Area/Responsibility Center (RA/RC) is to contact the MIS Help Desk by dialing **(718) 557-1313**, Option 1 from the Main Menu.

When reporting a telephone problem to the MIS Help Desk, the Telephone Liaison must provide the following information:

- RA/RC name
- Program site name
- Telephone number, address, floor and room number or cubicle number of problem equipment
- Number of phones affected
- Equipment type – single or multiple lines
- Description of the problem
- Primary contact and alternate contact person
- A working telephone number for contact purposes

After recording this information, the MIS Help Desk Representative will provide the Telephone Liaison with a ticket number (Help Desk Ticket Number). The MIS Help Desk Representative will forward this information to an appropriate vendor and the Telephone Liaison will be contacted regarding the repair within 24 hours. After vendor repair, an MIS Help Desk Representative will contact the Telephone Liaison to confirm the repair.

Voicemail

Refer to [PD #10-16-OPE](#) for more information on voicemail protocol.

To ensure compliance with the voicemail protocol, the Center Director/Center Manager must designate an Associate Job Opportunity Specialist (AJOS) II/Principal Administrative Associate (PAA) II as the Telephone/Voicemail Liaison. If staff is having technical problems with the voicemail, contact the Telephone/Voicemail Liaison.

Kiosk

Refer to [PB #05-102-OPE](#) for more information on Kiosks.

If the Automated Customer Information Station (Kiosk) is malfunctioning, the AJOS II in the Customer Service and Information Center (CSIC) must be informed. He/she must troubleshoot prior to contacting the Center-designated Outage Liaison. The AJOS II must first check for paper jams, toner, and connectivity (check to see if the Kiosk is plugged in). If the problem persists, the AJOS II must then contact the Center-designated Outage Liaison who will contact the MIS Help Desk and e-mail the SysAdmin.

Once the affected system/machinery functions have been restored, the appropriate liaison must inform the Center Director. The appropriate liaison and/or Center Director must then:

- inform the SysAdmin, and
- advise staff that the system/machinery is functioning properly.

Signature Pads

If a signature pad is not working, it is the JOS/Worker's responsibility to alert the Center-designated Outage Liaison of this problem who must report the outage to the MIS Help Desk.

Effective Immediately
