Page No.2

A new WMS report, WINR 3195, has been developed which reflects the number and percentage of PA-FS cases and NPA-FS cases that have been authorized for expedited food stamps.

The report will be produced quarterly and transmitted to local districts via BICS. The report will contain unit and worker activity broken down by local office and unit, and will include a local district summary page.

The report can be used as a management tool by local districts to monitor expedited food stamp authorization processing activity within each local district. It should be noted that if an individual applied more than one time in a month, that application will only be counted once.

The first run of the report will occur on October 7, 1995 covering the months of July, August and September 1995.
