I. PURPOSE

The purpose of this directive is to advise social services districts of revised Department regulations related to market rates for child care services and the revised maximum reimbursement available for all child care payments.

II. BACKGROUND

The federal Family Support Act of 1988 (FSA) and the 1995 State Aid to Localities Budget (Chapter 53 of the Laws of 1995) require that the Department biennially conduct a survey of the actual costs of child care services and update the local market rates for child care services based on the survey. The market rates represent the maximum reimbursement that is available from the State to social services districts for child care payments made on behalf of eligible families. In accordance with federal and State statutory requirements, the Department has conducted the required biennial survey of child care costs and has updated the local market rates based on the results of the survey. The attached market rates became effective October 1, 1995.

The market rates were calculated in accordance with the federal requirements for the establishment of such rates. The methodology used to establish the market rates is subject to approval by the federal Department of Health and Human Services as part of the State's Supportive Services Plan for the JOBS program. Under the federal requirements, the rates must be based on the rates providers actually charge parents and must be established at the 75th percentile of such charges. In addition, market rates must be differentiated by type of provider, age of child, duration of care and geographic location.

Rate data was collected by mailing a survey form to all regulated child care providers with the exception of those child day care providers in New York City that provide all of their child care services pursuant to contracts with the City's Agency for Child Development (ACD). To ensure that the rates cited on the survey were valid, the Department contacted a sample of providers. In addition, the Department anonymously solicited information about charges for care for children of various ages. This information was compared with the data provided on the written survey.

The market rates for informal child care were established at the 75th percentile based on data obtained by surveying caregivers of informal child care in one social services district. The percent difference in rates between the family day care rate and the informal child care rate in this social services district was determined. This differential then was applied to the market rate established for family day care in all

other social services districts to derive a rate for informal child care for each county.

III. PROGRAM IMPLICATIONS

A. Actual Cost of Care

Effective October 1, 1995, payments for JOBS-related Child Care, Employment-related Child Care, Transitional Child Care (TCC), At-Risk Low Income Child Care (ARLICC), Child Care and Development Block Grant (CCDBG) and Low Income Day Care (LIDC) services must be for the actual cost of care up to the applicable market rate as updated (see Attachment A). The actual cost of care is the usual rate charged by the provider for non-subsidized care.

Social services districts may negotiate rates with individual providers. A fairly negotiated rate can be advantageous to both the social services district and the provider. Social services districts may offer incentives such as direct payment, insurance, equipment and supplies to the providers with whom it contracts. In return, social services districts frequently receive a discount on child care purchases. Even though the negotiated rate may be less than the usual charge to non-subsidized families, the negotiated rate is considered the actual cost of care for those child care services provided under a contractual agreement between the social services district and the provider. However, a contract may not be made a condition of receiving payment from JOBS-related Child Care, Employment-related Child Care, TCC, ARLICC or CCDBG funds.

B. Selection of the Applicable Market Rate

Whenever child care services are provided, the social services district must consider four factors when selecting the applicable market rate. These factors are:

1. "Type of Provider

- a. Licensed or registered day care centers and caregivers of legally-exempt group child care - The maximum payment rate for care provided by licensed or registered day care center providers and caregivers of legally-exempt group child care as defined in section 415.1(n) of the Department's regulations is the applicable market rate for day care centers.
- b. Registered family day care providers - The maximum payment rate for care provided by registered family day care providers is the applicable market rate for family day care.

- c. Licensed group family day care providers - The maximum payment rate for care provided by licensed group family day care providers is the applicable market rate for group family day care.
- d. Registered school-age child care programs - The maximum payment rate for care provided by registered school-age child care programs is the applicable market rate for school-age child care.
- e. Caregivers of informal child care - The maximum payment rate for care provided by caregivers of informal child care as defined in Section 415.1(c) of the Department's regulations, other than those paid using Child Care and Development Block Grant (CCDBG) funds, is the applicable market rate for in-home care. For child care services provided under the federal CCDBG program, the maximum payment rate for care provided by a caregiver of informal child care, other than in-home providers, is the applicable market rate for family day care.
- f. Caregivers of in-home child care - The maximum payment rate for care provided by caregivers of in-home child care as defined in Section 415.1(c) of the Department's regulations is the applicable market rate for in-home care.

2. Age of Child

Market rates are differentiated by the age of the child. The age categories are:

- a. under 1-1/2 years;
- b. 1-1/2 years through 2 years;
- c. 3 years through 5 years; and
- d. 6 years through 12 years.

When a change in a child's age results in movement from one age category to another, the new market rate limit should be applied at the beginning of the first full month following such a change.

3. Duration of Care

Market rates also are differentiated by the number of hours of care that are needed.

a. Weekly

The social services district may apply the weekly rates as the maximum payment limit when the child care services are provided for 30 or more hours over the course of five or fewer days in a single week.

b. Daily

The social services district may apply the daily rates as the maximum payment limit when the child care services are provided for at least six but less than twelve hours per day.

c. Part-day

The social services district must apply the part-day rates as the maximum payment limit when the child care services are provided for at least three but less than six hours per day.

d. Hourly

The social services district must apply the hourly rates as the maximum payment limit when the child care services are provided for less than three hours per day.

When a child day care provider routinely charges non-subsidized parents on a weekly basis and has not signed a purchase of service contract or other written agreement for payment on a different basis, the social services district must apply the weekly rate as the maximum payment limit for child care services that are provided for 30 or more hours per week for five or fewer days. When the child care services are provided for less than 30 hours per week, the social services district must apply the daily, part-day or hourly rates, or a combination thereof, as applicable.

When a social services district enters into a purchase of service contract or other written agreement with a provider, the social services district must select either a weekly or daily method of payment for full time child care, and apply these methods consistently throughout the contracts.

When child care services are provided by a single provider in excess of one weekly or daily period as defined in Section 415.9(a) and (b), payment for the additional child care services will be based on the actual cost of care up to the applicable rate. For example, Mrs. Jones cares for Genny for eight hours per day, Monday through Saturday. The maximum payment available is one weekly market rate plus one daily market rate or six daily rates.

Payment for child care services which are provided by multiple caregivers during the course of a single day or week will be made to each caregiver for the actual cost of such services up to the applicable market rate for each. For example, Kids Choice Day Care Center cares for David from 7:30 AM to 4:30 PM, Monday through Friday. Mr. Johnson, a neighbor, cares for David from 6:00 PM to 9:30 PM on Tuesday and Thursday. The maximum payment available is one weekly market rate for Kids Choice Day Care Center and two part-day market rates for Mr. Johnson.

4. Location of Care

Whenever child care services are provided by a caregiver located outside the social services district which authorizes the subsidy, the social services district must make payments based on the applicable market rates for the county in which the care is located.

C. Consideration for Children With Special Needs

When child care services are provided to children with special needs, social services districts will receive reimbursement for payments in excess of the applicable market rate when the increased payments are the result of increased costs associated with meeting the special care needs of such children. Section 415.9 of the Department's regulations provides that the rate of payment for child care services provided to a child with special needs is the actual cost of care up to the Statewide limit of \$217 per week when the services are provided for 30 or more hours per week. When the child care services are provided for less than 30 hours per week, the payment rate is the actual cost of care up to \$145 per week. Detailed policies and procedures relative to the provision of child care services to children with special needs are set forth in 91 ADM-34.

IV. REQUIRED ACTIONS

Review of Current Cases

A. Employment-related Child Care

When Employment-related Child Care is authorized for employed PA recipients, the social services district must disregard earnings up

to the actual cost of child care, the applicable disregard, or the applicable market rate, whichever is less. Employment-related Child Care is provided as a supplemental payment when the actual cost of the child care exceeds the child care disregard and the recipient is using an eligible provider as defined in Section 415.1(h) of the Department's regulations. The amount of the supplemental payment when added to the child care disregard must equal the lower of the actual cost of the child care or the applicable local market rate, as updated. See 93 ADM-11 for further details on employment-related child care. When a child has special needs as defined in 91 ADM-34, the total of the supplemental payment and the child care disregard must equal the lower of the actual cost of care or the statewide limit (see III.C.).

B. JOBS-related, TCC, ARLICC, LIDC, and CCDBG Services

Social services districts must review all currently authorized cases to ensure that payment is authorized for the actual cost of care up to the applicable market rate, as updated. When a child has special needs as defined in 91 ADM-34, social services districts must ensure that payment is authorized for the actual cost of care up to the Statewide limit (see III.C.).

Social services districts should pay particular attention to those authorizations which are at the pre-October 1, 1995 market rate limit. When the market rate has increased as a result of the update, recipients who are paying child care costs in excess of the previous market rate are eligible for an increased payment from the district (their actual child care charges up to the updated market rate). In a few instances, the market rate has decreased and the social services district will need to reduce benefits. Whenever the amount of the authorized payment changes, social services districts must provide recipients with appropriate notice as required by Part 358 of the Department's regulations. See 93 INF-5, "Revised Client Notification Forms," for model notices.

V. SYSTEMS IMPLICATIONS

This ADM has no systems implications.

VI. EFFECTIVE DATE

The effective date of this ADM is January 15, 1996 retroactive to October 1, 1995.

Rose M. Pandozy
